About me

Dmitry Petrov
 **@FullStackML**

Before

Ex-Data Scientist at Microsoft

Now

Creator of **D**ata **V**ersion **C**ontrol

Co-founder, CEO at Iterative.ai
(San Francisco, CA)

You will learn...

1. The importance of **experiment tracking**
- 2.
- 3.

You will learn...

1. The importance of **experiment tracking**
2. How to leverage the tools in ML you are already using: **VScode, Git**
- 3.

You will learn...

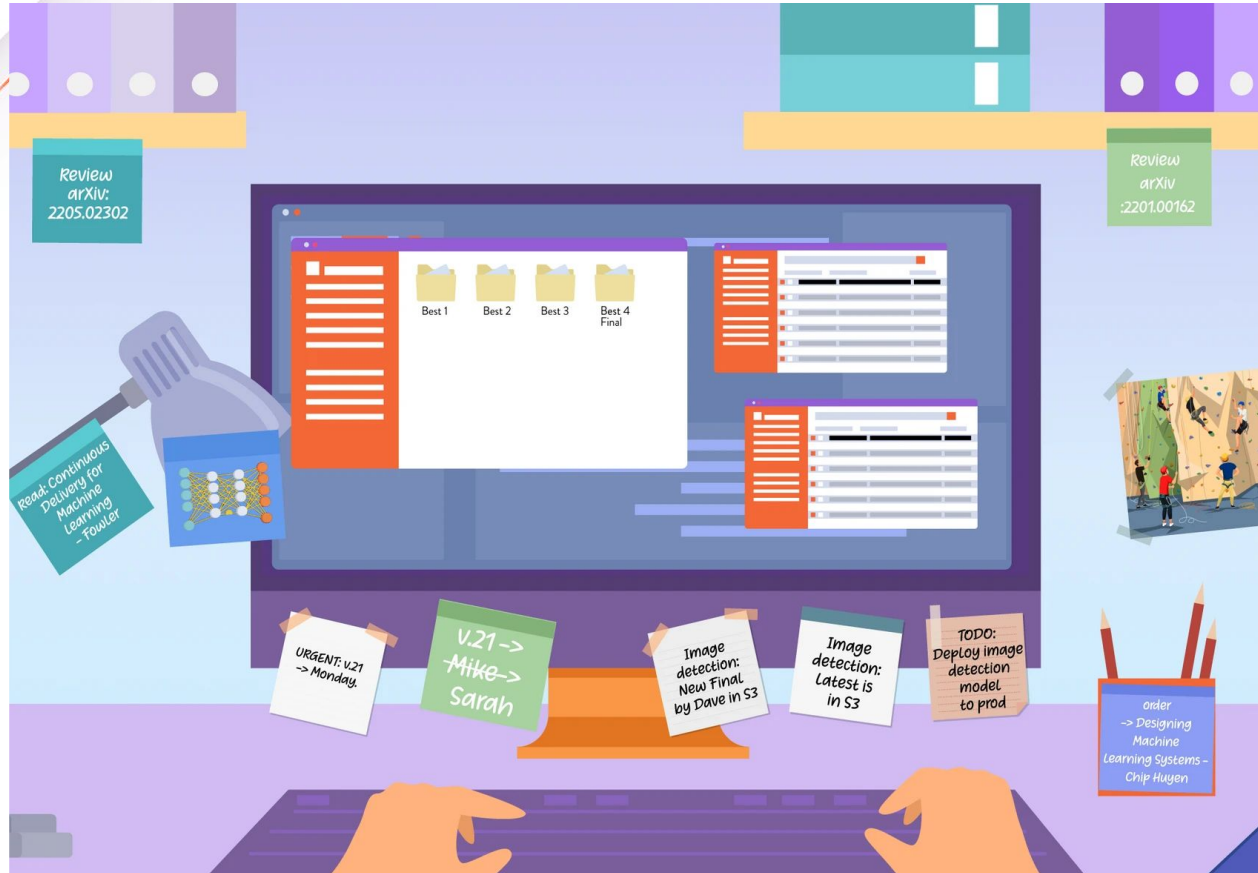

1. The importance of **experiment tracking**
2. How to leverage the tools in ML you are already using: **VScode, Git**
3. Easy set up of GPU resources - **Codespaces**

I. ML experiments tracking

The struggle is real...

Why do we track ML experiments?

- 1. Log.** Data, metrics, hyper-parameters, code.
- 2. Organize.** Centralized place to store.
- 3. Reproduce.** Save experiments & recover for future self and team.

History of ML Experiment Tracking Tool

Sacred

2014

2018

2022

How it looks like (Sacred example 1)

	Id	Optimizer Name	Batch Norm	Lr	Epochs Per Lr	Batch Size	Val accuracy (patch)	Val accuracy (image)	Val loss
▶	166	SGD	true	0.003	8	8	0.866718106995	0.919821673525	0.4269460
▶	163	SGD	true	0.003	8	12	0.988106060606	0.999393939393	0.0514828
▶	157	SGD	true	0.003	8	12	0.988989898989	0.998383838383	0.0459522

How it looks like (Sacred example 2)

	Id	Experiment name	Command	Start time	Last activity
+	39	MNIST with TF 1.8.0	main	01:45:25 PM 05/01/2018	01:47:06 PM 05/01/2018
-	34	German nouns	runExperiment	07:06:41 PM 05/06/2017	07:14:30 PM 05/06/2017

Details for: German nouns (id: 34)

History of ML Experiment Tracking Tool (2)

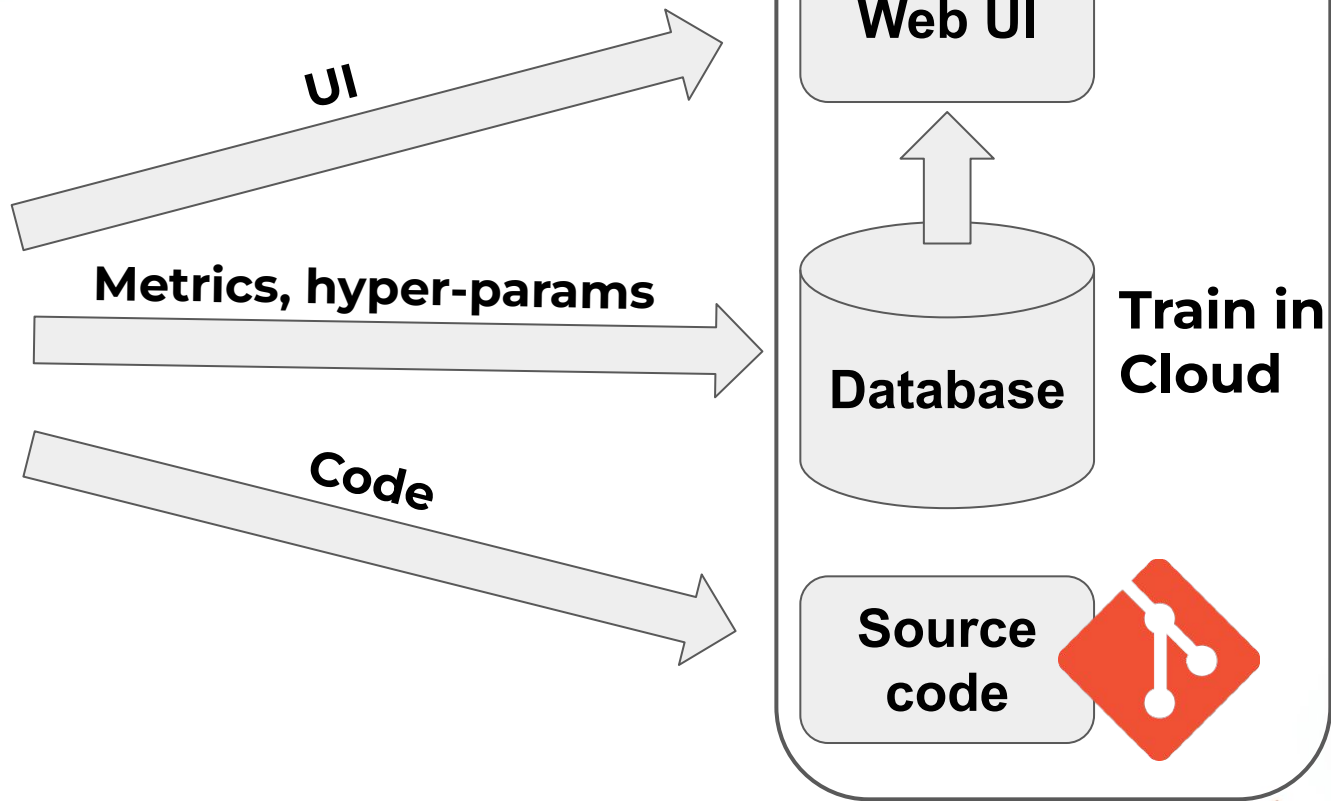

Exp tracking architecture

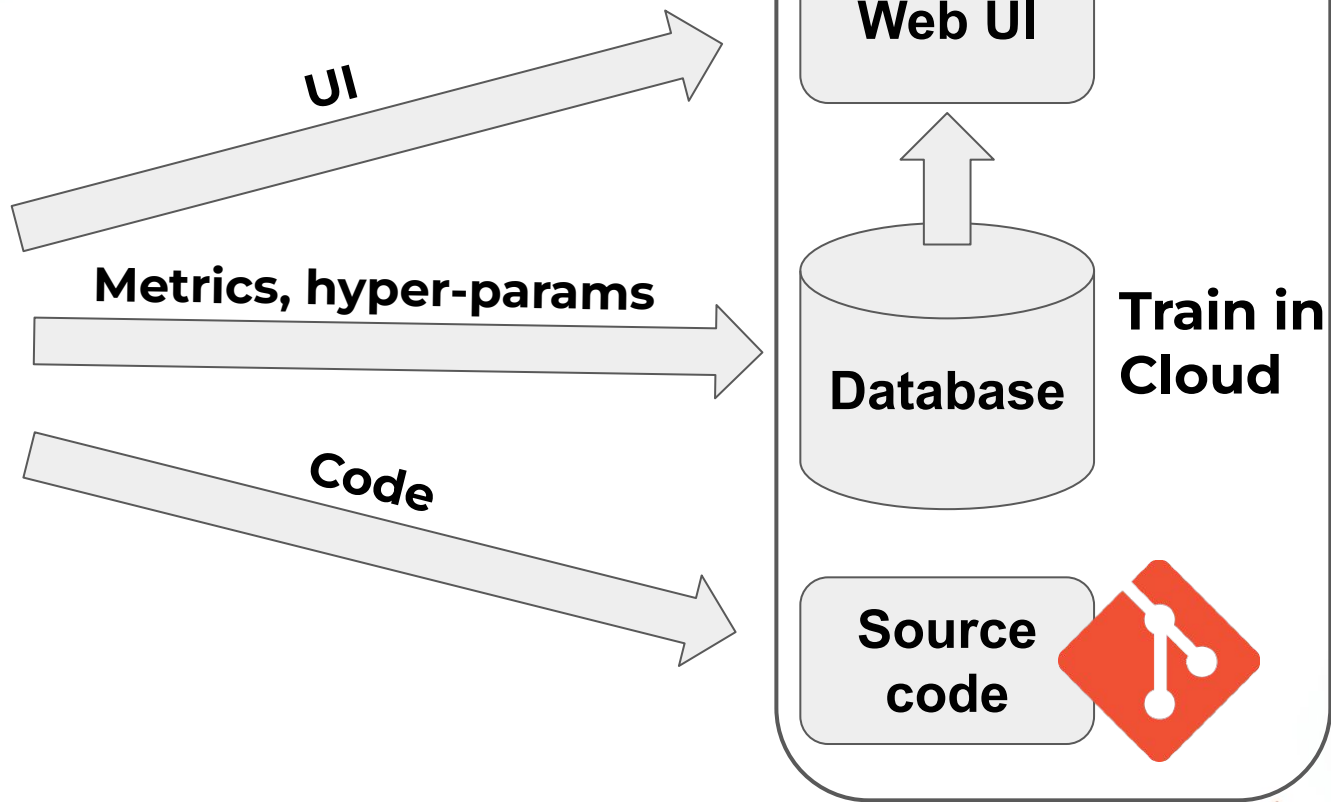

Exp tracking architecture: SaaS

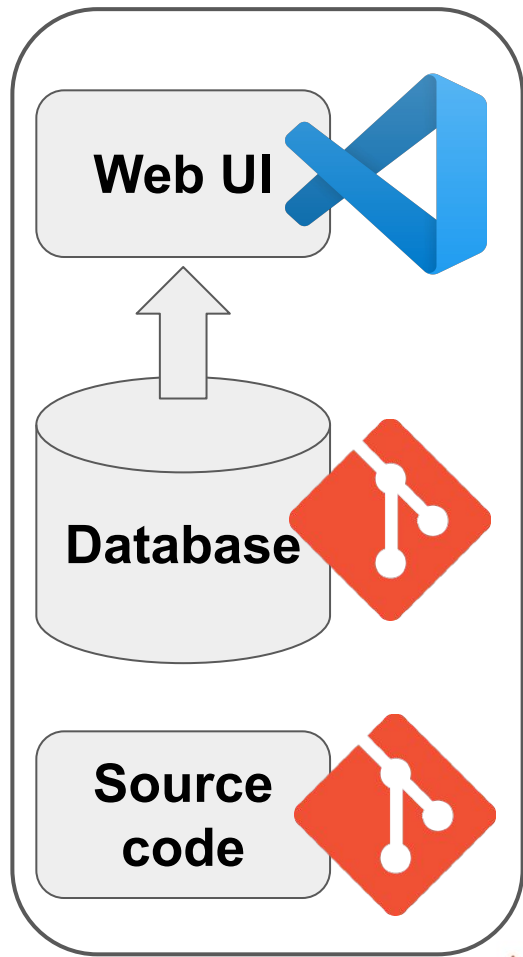

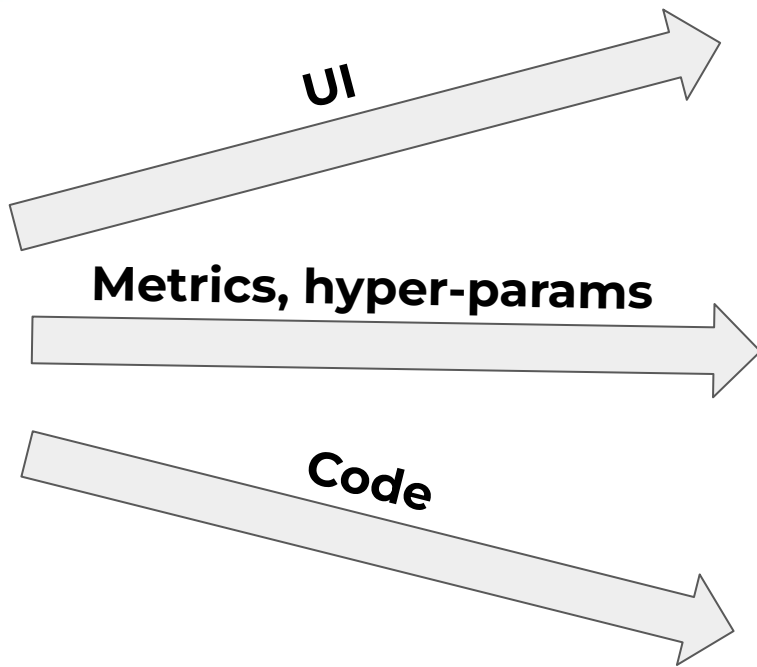

Exp tracking architecture: cloud

Can we do better?

Exp tracking architecture

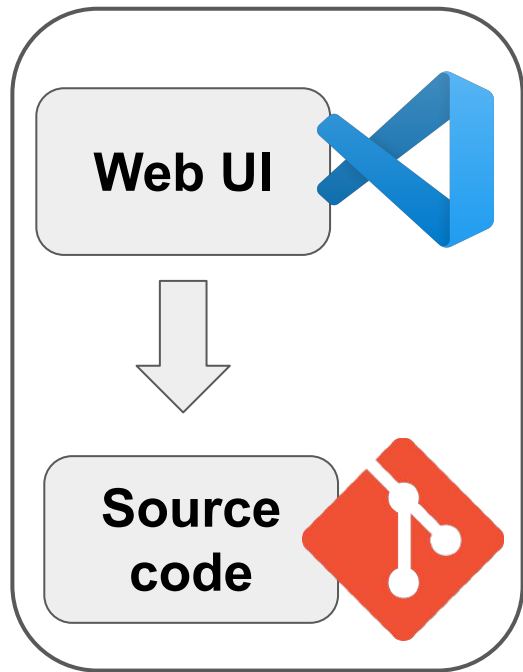

Codespaces

Exp tracking architecture

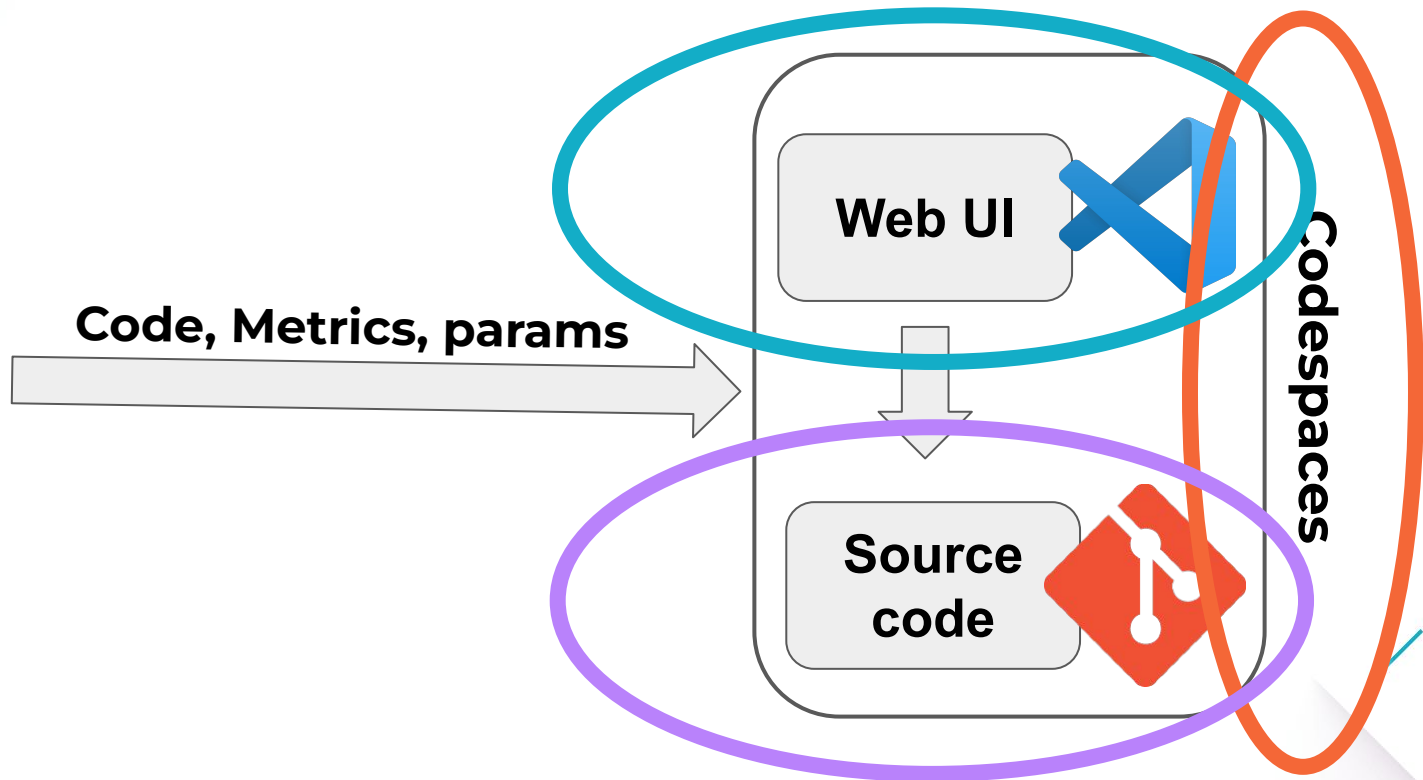

Code, Metrics, params

Codespaces

Exp tracking architecture

Benefits of Git for experiments

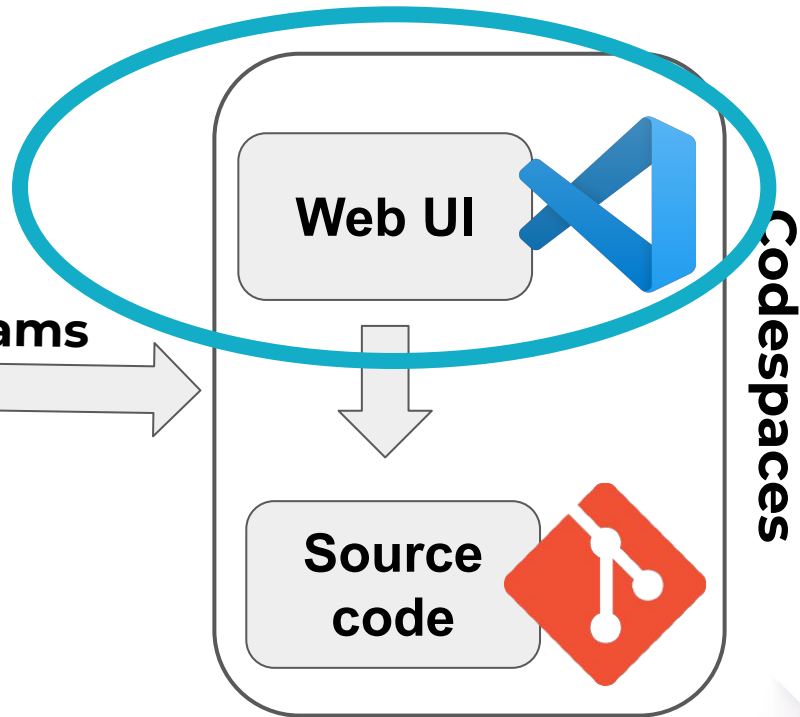

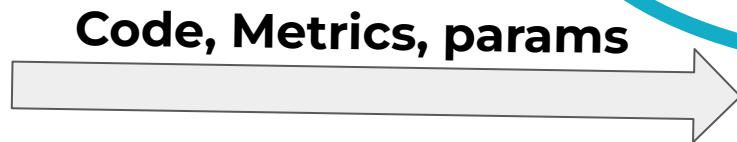

1. Reduce the number of moving parts in ML infrastructure
2. Git becomes the single source of truth for ML experiments

II. VScode for experiment tracking

Simplified architecture

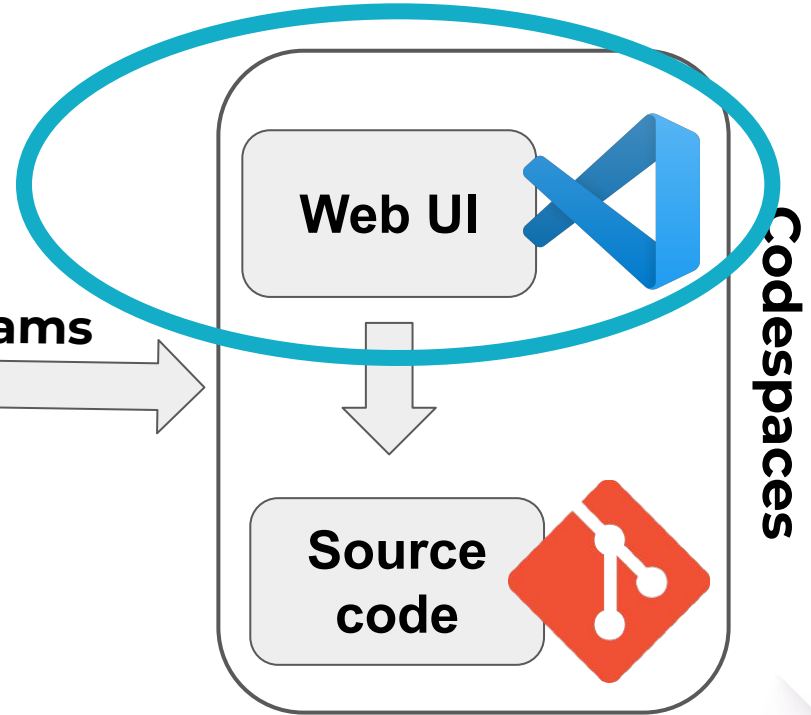

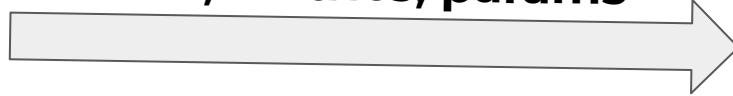

Demo - VScode

Simplified architecture

Code, Metrics, params

- Right in your IDE
- Serverless

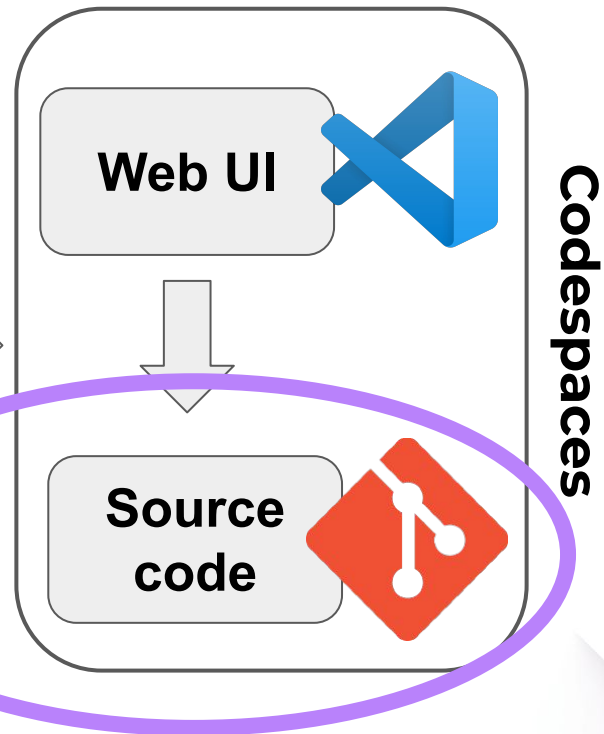

III. Experiments tracking with Git

Demo - ML with Git

Code, Metrics, params

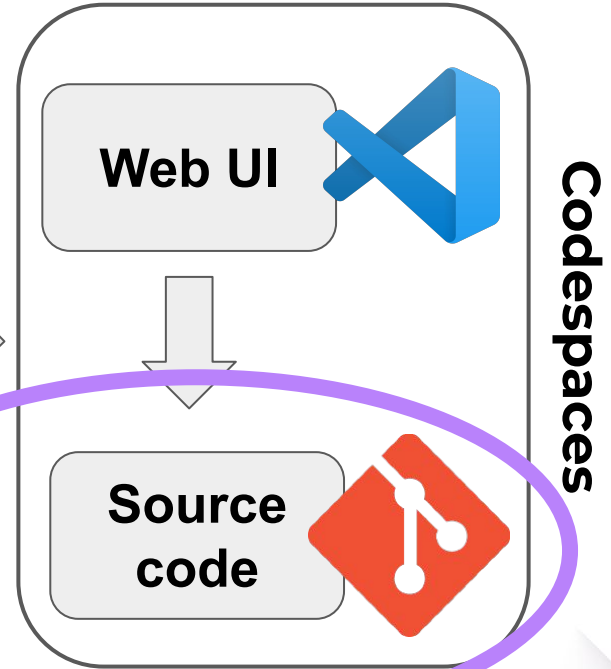

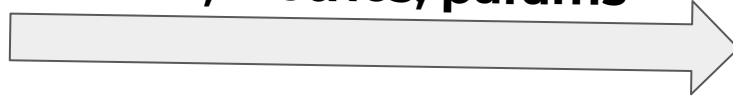

Demo - ML with Git

Demo - ML with Git

Code, Metrics, params

- Git as the source of truth
- Collaboration in GitHub

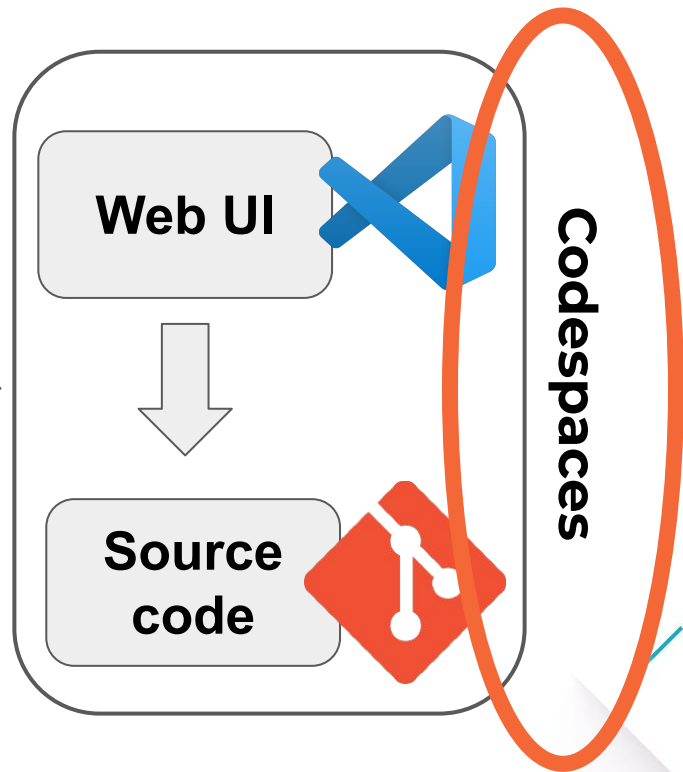

IV. Codespaces for training ML models

Demo - ML with Git

Code, Metrics, params

Conclusion

Git ecosystem simplifies MLOps:

- 1.
- 2.
- 3.

Conclusion

Git ecosystem simplifies MLOps:

1. **ML engineer.** Use Git that you already know.
- 2.
- 3.

Conclusion

Git ecosystem simplifies MLOps:

1. **ML engineer.** Use Git that you already know.
2. **Teams.** Break the wall between ML and Eng teams.
- 3.

Conclusion

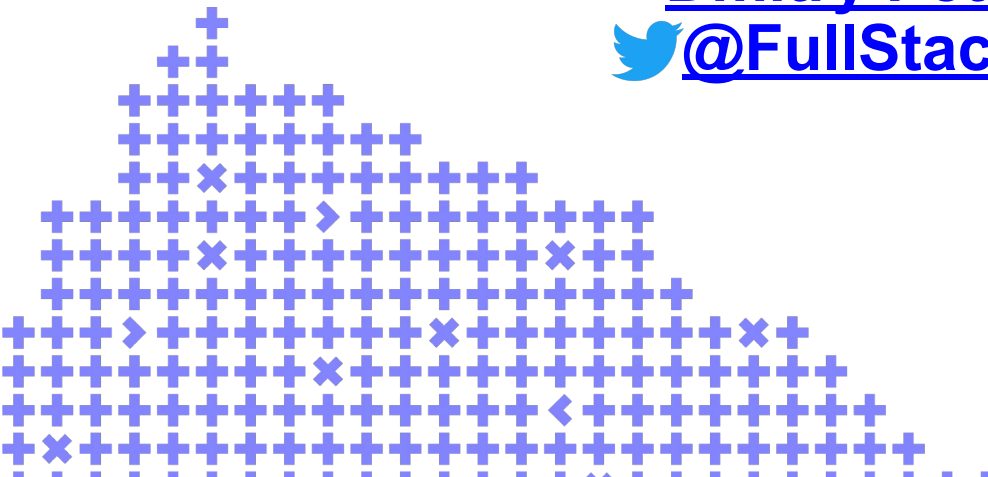

Git ecosystem simplifies MLOps:

1. **ML engineer.** Use Git that you already know.
2. **Teams.** Break the wall between ML and Eng teams.
3. **Business.** Maximize value from your investments in Git tools.
